

How the A.D. Toolbox and Adobe Work Together

The AD Toolbox information files are accessed using either Adobe *Acrobat* or *Reader*.

The free Adobe *Reader* works just fine to navigate and view files. It can also be used to **fill out** and **print** all the FAA and custom forms we include such as 337, Weight and Balance, and Logbook Stickers.

The only time you need Adobe *Acrobat*, is if you want the ability to save electronic copies of the above mentioned forms to your computer.

Adobe *Acrobat* gives you all the abilities of Adobe *Reader* and more. It gives you the ability to **save**, **re-open** and **edit** electronic copies of your forms.

You do not need Adobe *Acrobat*, to create and work with our AD Compliance Reports, as they open in a separate window with a different program.

	Adobe Reader	Adobe Acrobat
Navigate the A.D. Toolbox	X	X
View and Print Forms/Files	X	X
Fill-Out Forms	X	X
Save Forms		X
Re-Open and Edit Forms		X
